ORION 2026 EXERCISE

ORION 26 is a major French Armed Forces exercise currently being conducted in the Champagne region. It involves the deployment of land and air forces in a division-level operation in open ground, integrating the full chain of command, as well as support and logistics components.

This exercise represents a key milestone in France's preparation for high-intensity conflict. Its objective is to train forces to operate in complex, contested, and multi-domain environments. ORION 26 demonstrates France's strong commitment to defending its territory, population, and strategic interests by preparing for the most demanding operational scenarios.
